Full Stack Web Developer

EDUCATION

Lambda School, Remote— Seeking Endorsement

June 2019 - PRESENT

Full Stack Software Engineer training in a team driven environment. Learned HTML, CSS, JavaScript, React, Redux, NodeJS, Express, SQLite, data structures, algorithms and soft skills to become a well rounded software developer and computer scientist.

Brigham Young University, Provo, UT— B.S. Psychology

August 2012 - April 2018

Understood and applied basic research methods in psychological writing and projects; including data analysis and interpretation, research design and implementation, ethics and applied psychometric methodologies.

EXPERIENCE

Team Lead, Remote— Lambda School

January 2020 - Present

Mentored 8-9 students full time in contracted position. Conducted daily stand up meetings, 1 on 1 code reviews, and hosted Q/A sessions. Assisted students in learning leadership and soft skills via zoom meetings daily.

DCFS, Nephi, UT— Child Welfare Caseworker

December 2018- July 2019

Maintained court documentation standards in accord with state regulation. Facilitated child and family team meetings; empowered family members to connect and advocated for children who had been abused.

PROJECTS

Block Club Calendar— Junior React Dev

October 2019-- <https://blockclubcalendar.now.sh/>

Created react components, specifically a date picker and login form. Implemented Material UI and used Web Hooks to manage apps state.

Second Chance— Senior React Dev

November 2019-- <https://second-chance.now.sh/>

Created CRUD functionality to interface with web API and access resources from database asynchronously.

Plant Purpose— Junior React Dev

September 2019-- <https://plantpurpose.now.sh>

Styled the front end via LESS preprocessor and created the mobile responsiveness of the app. Created a registration page and linked to backend API. Worked with a team of six full stack developers and one UX designer in a hackathon 30 hour challenge to complete project.

PROFICIENT SKILLS

HTML5 CSS3 ES6 React / Redux LESS
